FIGURE 1 — Appendix O, Freezing Drizzle, Liquid Water Content

The graph shows the liquid water content in grams per cubic meter as a function of ambient temperature in degrees Celsius. Two regions are highlighted:

- **Freezing Drizzle Environments MVD < 40 μm (Dark + Light Gray)**
  - Liquid Water Content: 0.27 g m⁻³ at -30°C, 0.29 g m⁻³ at -20°C, 0.44 g m⁻³ at 0°C

- **Freezing Drizzle Environments MVD > 40 μm (Light Gray)**
  - Liquid Water Content: 0.18 g m⁻³ at -30°C, 0.27 g m⁻³ at -20°C, no data above 0°C
