FIGURE 3 — Appendix O, Freezing Drizzle, Temperature and Altitude

Ambient Temperature (degrees Celsius) vs. Pressure Altitude (1000-feet)

- The graph shows the relationship between ambient temperature in degrees Celsius and pressure altitude in thousands of feet.
- The shaded area indicates the region where freezing drizzle is expected.
- The temperature range is from -30°C to 0°C, and the pressure altitude range is from 0 kft to 22 kft.
